## A United Effort

Our United Way Division Coordinators are currently making arrangements for the upcoming division meetings. These short sessions will describe the United Way's functions and will explain how our 1980 campaign will be working.

This year, division competition will be encouraged, with a special award going to the Division with the greatest percent participation. Employees may take part in the United Way effort through convenient payroll deduction, or you may opt for a direct contribution. In either case, you have the option of designating that a specific agency be the recipient of your gift.

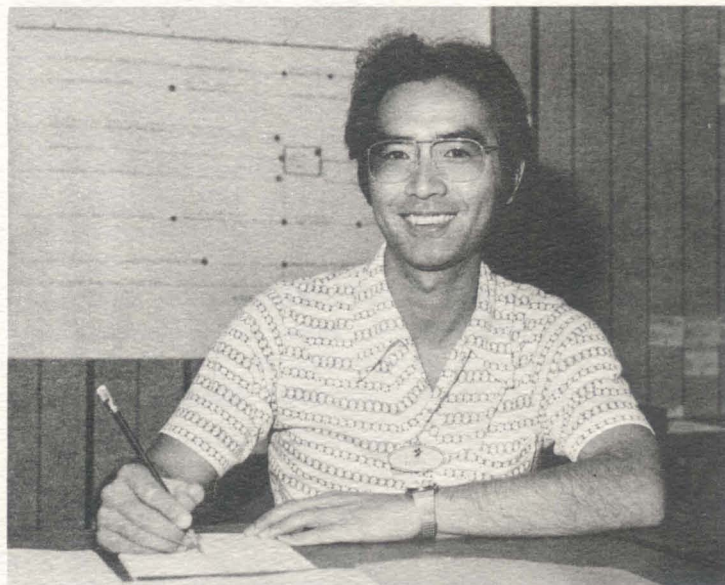

Around the time of your meeting, your representative will be supplying you with your pledge card, which you are requested to fill out and return as soon as possible, even if you choose not to contribute.

If you have any questions about the United Way, they will be answered at your meeting. In addition, if you have a specific question about receiving assistance from one of the United Way agencies, your division representative or the Disney University will be able to help.

Look forward to hearing more about the time and location of your division's meeting from your representative.

And, don't forget to give... the United Way.

## West... Meet East

*This is the first in a series of profiles featuring the manufacturing and maintenance trainees of the Oriental Land Company who are here at WED & MAPO for the Tokyo Disneyland Project.*

Hiroyuki "Hiro" Hamaguchi comes to us from OLC's Show and Ride Division. He is currently training in Electrical Assembly at MAPO with Russ Read and Mike Dykman. Some of the activities included as part of his

training involve engineering designs with Department 510 and assisting in the start-up of the Pirates Animation Program.

Prior to working on the TDL Project, Hiro was assigned to construction management as a traveling engineer for projects such as the Keio University Library Building Construction Works and Nikkin Matsudo Housing Expansion Construction Works. He is a graduate of the Chiba Institute of Technology.

## Introductions Are In Order

Please join us in welcoming the following new members to the WED & MAPO team: (left to right) JOEL MARTINEZ, Plastics Fabrication; ED ZEIGLER, Lighting/Special Effects; MICHAEL LO VULLO, Production Services; RON BEUMER, Electrical Engineer; KRIS LANBERG, Structural Engineer; RENE JUELL, Janitorial; JOHN MORGAN, Communications; MARGUERITE CAVANAUGH, Special Services; RICHARD OCHOA, Plastics Fabrication; DON UETZ, Plastics Fabrication; JOE MILLER, Machinist; ED DENNING, Project Accounting.

## WEDlines.....

...Our Co-Ed Softball Teams are all fired up to meet their challenges this week. The WED Sox will be taking on Glendale Tree this Thursday, October 30 at 6 p.m. on Glorietta Field. On Sunday afternoon, November 2, the Disney Ducks will be hosting the visiting Peppermints at 2 p.m. on Pelanconi Field. You won't want to miss the action!

...Those of you who did not receive a form to sign up for a donation to our 1980 Blood Drive, please contact Kathy Nelson at the Disney University, extension 7243, by Wednesday, October 29. The Red Cross Mobile Unit will be at WED & MAPO this Thursday, October 30 from 8 a.m. to 5 p.m., adjacent to the WED Gallery patio.

## The Foney Pages

If you think your phone has been behaving strangely of late, you are probably correct. Between power failures in the City of Glendale and the changes WED & MAPO is making internally to upgrade our system to be compatible with the Dimension phone system being installed at the Studio in December, our poor phone computer has developed a migraine.

Never fear! The worst that can happen is that you'll have to reprogram your phone, and the best is that you'll soon realize that your phone is trying to talk to you.

If you hear three beeps after you have dialed your local or long distance number, your phone is talking to you. In a way, it is saying, "Not now, I have a headache. All outside lines are busy, so, if you'll just hang up, I'll call you back when I'm ready."

When the next out line becomes available, the computer will call you back with three short rings. When you answer, you will hear your call being put through automatically. You don't have to redial the number, for the computer (even with its migraine) stored it in its memory when you first called. You may call it another wonder of modern science; Bell Telephone calls it Trunk Queuing.

Check your dialing instructions for further information about what your phone can do for you.

And talk to your phone. It wants to be your friend. It wants to help you. As a matter of fact, one popular WED & MAPO executive (name withheld) started to sing to his phone and hasn't had a problem since.

How about a friend who doesn't mind if you're phoney?

*Thanks to Valerie Warner of Switchboard fame for her assistance in preparing this story.*
